

Teaching & Assessment

Students on this course are required to take three modules totalling 60 credits. Two out of the three compulsory modules, Research Skills and Clinical Leadership, are worth 15 credits each. The third compulsory module is a postgraduate module worth 30 credits in a medical specialty. The course is delivered using blended learning.

Students will be assessed through a combination of coursework, essays, presentations and written exams

Location

Denmark Hill or St Thomas' campus

Duration

1 year full-time
2 years part-time

Advanced Medical Training PG Cert

Postgraduate study

www.kcl.ac.uk/lsm

"This advanced study programme will deepen your knowledge in the selected medical specialty of choice, further develop your research and evidence-based evaluation skills and enable you to strengthen your clinical leadership skills to enhance your career opportunities."

Professor Anne Greenough
Programme Lead

Our programme is designed to provide participants with an advanced and comprehensive understanding of the theoretical and practical issues surrounding medical care in the selected medical field of choice.

The postgraduate specialty modules will cover the most up-to-date and novel aspects of clinical care and by successfully completing the required module, students will gain an in depth understanding of innovative care for patients in the selected field of medical expertise.

Course Detail

The PG Cert in Advanced Medical Training is a postgraduate qualification available in eight medical specialties.

In addition to online modules in Research Skills and Clinical Leadership, students can select a module from the following eight different medical specialties:

- Addiction Studies
- Affective Disorders
- Children's Health
- Clinical Neuroscience
- Development Psychology and Psychopathology
- Haematology
- Neuroscience and
- Women's Health.

The programme consists of three modules. It is flexible, so the order you take the modules is your choice. This means you can join the programme at two points of the academic year, either in January or September.

Career Prospects

The course is designed for current medical professionals interested in developing a career which includes clinical research and leadership. Graduates may progress to leadership and management roles in the NHS, university or private sector, as well as internationally.

Key Benefits

- Flexible learning - the course is delivered using blended learning
- Access to using blended learning and to the latest leading cutting edge technologies housed across King's Health Partners NHS Foundation Trusts Hospitals
- The clinical leadership module is delivered by King's Business School, a leading management teaching institution in London, and King's Health Partners NHS Foundation Trusts
- Teaching focuses on translating research to improve clinical outcomes locally and globally
